Summary

Senior Full Stack Software Engineer with 5+ years of experience building high-performance distributed backend services, real-time web applications, and database architectures.

Experience

Senior Software Engineer

Nexus Tech Labs | 2021 – Present

- Engineered RESTful microservices in Python (FastAPI) handling 20,000 requests per minute with 99.99% uptime.
- Optimized PostgreSQL database queries and indexing strategies, reducing median response latency by 35%.
- Implemented Redis cache strategy to accelerate user session state resolution.

Full Stack Developer

Apex Innovations | 2019 – 2021

- Developed responsive web dashboards using React, TypeScript, and Tailwind CSS.
- Integrated WebSocket channels for real-time live data streaming across 10,000 concurrent clients.

Education

B.S. in Computer Science

University of California, Berkeley | 2015 – 2019

Skills

Python, FastAPI, React, TypeScript, PostgreSQL, Redis, Docker, Git, REST APIs
