Alex Doe

Backend Engineer

alex.doe@example.com | +91 90000 00000

PROFESSIONAL SUMMARY

Backend engineer with 3 years building Python APIs and data pipelines. Experienced in high-throughput services, caching layers, observability, incident response, database tuning, asynchronous workers, API design, and mentoring. Comfortable owning services end to end from design to production.

WORK EXPERIENCE

Backend Engineer *ExampleCorp*

- Achievement 1: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 2: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 3: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 4: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 5: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 6: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 7: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 8: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 9: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 10: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 11: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 12: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 13: delivered measurable impact on service reliability, latency, and developer productivity across the platform
- Achievement 14: delivered measurable impact on service reliability, latency, and developer productivity across the platform

EDUCATION & CREDENTIALS

B.Tech Computer Science 2023
Example University

CORE COMPETENCIES & SKILLS

Python | FastAPI | PostgreSQL | Redis | Docker | Kafka | Kubernetes | AWS | Terraform | Grafana | Pytest | Celery
